Profile

I'm a fresher with expertise in web development and proficiency in javascript frameworks. I have build projects implementing javascript frameworks and excel in backend development with nodejs and frontend development with React.js. My experience includes creating ApnaVideoCall (a Video Conferencing Platform), TradeNest (a Zerodha-inspired trading dashboard), and Wanderlust (an Airbnb-style rental platform). I'm excited to apply my learning and passion for real-world problems.

Education

Bachelor of Computer Applications (BCA) | (2022-2025)

CGPA- 8.44 , SPI-9.04(6TH SEM) BRABU,Muzaffarpur,Bihar

HSC (2022) Chandrasheel Vidyapeeth
Percentage – 57.8 Kanti,Muzaffarpur, Bihar

SSC (2020) D.A.V Public School
Percentage - 69 Kanti,Muzaffarpur, Bihar

Skills

- Javascript : Reactjs
- Frontend Development : HTML, CSS, JS, React.js, tailwindcss
- Backend Development: Nodejs , MongoDB
- Programming Language : C(basic), Java, Python

Experience

I am fresher right now. I don't have any experience.

Projects

SigmaGPT ([CLICK TO VISIT](#))

SigmaGPT is an advanced AI-driven conversational platform developed by our team using the MERN stack (MongoDB, Express.js, React.js, Node.js). It delivers a sophisticated user interface for seamless natural language interaction, leveraging the Gemini model to provide real-time, intelligent responses and data-driven insights. With a focus on high-performance rendering and a scalable frontend architecture, SigmaGPT offers a modern, responsive solution for automated digital communication. In this project, I spearheaded the frontend development, ensuring an intuitive user experience and efficient client-side state management.

WanderlustHomes ([CLICK TO VISIT](#))

WanderlustHomes is a travel-focused e-commerce platform specializing in premium property rentals, developed using the **MERN stack**. The project includes a main user-facing website for browsing and booking unique stays, along with a comprehensive admin panel for managing listings, reservations, and customer reviews. By integrating interactive maps and secure authentication, Wanderlust offers a seamless, modern experience for both travelers and property hosts in the vacation rental market.

Apna Video Call ([CLICK TO VISIT](#))

A real-time video conferencing platform enabling seamless peer-to-peer communication. Integrated **Socket.io** for low-latency audio/video streaming and **WebRTC** for secure, high-quality data exchange. Features private meeting rooms, instant in-call messaging, and responsive media controls, delivering a robust and scalable virtual collaboration experience.

TradeNest ([CLICK TO VISIT](#))

TradeNest is a stock trading platform. It is developed using MERN stack for frontend and backend.

Gitly ([CLICK TO VISIT](#))

Gitly is a robust version control and collaboration platform developed using the **MERN stack** (MongoDB, Express.js, React.js, Node.js) to emulate the core functionalities of GitHub.
